- Oracle AI Foundation Associate
- Privacy and Security in Online Social Media(NPTEL)
- Edge Computing (NPTEL)
- Computer Grapics (NPTEL)

SOFT SKILLS

- Teamwork
- Creativity
- Leadership Effective
- Problem Solving

CAREER OBJECTIVE

To contribute effectively to a dynamic organization by utilizing my problem-solving skills and passion for continuous learning, while striving to enhance business outcomes and drive innovation.

PROJECTS

Sentiment Analysis Of Product Rating:
Sentiment analysis transforms raw customer feedback into actionable insights by using computational linguistics to decode the emotional tone behind product ratings.

Social Media Analysis Dashboard:
Centralized MERN dashboard aggregating cross-platform metrics to visualize engagement, audience growth, and actionable ROI insights.

Sports Connect:
We are build an unique platform where sports persons and sports associations can easily connect and grow together. This platform will help players create their own profiles by adding their achievements, certificates, and performance videos.

Face login using recognition :
Face login uses facial recognition to verify a user by matching their facial features with stored data. It provides secure and convenient access through biometric authentication.

INTERNSHIP

- **Black Pearl Logics**(1 months , online)   **2024**
Completed a web development internship where I learned HTML, CSS by building responsive websites and UI projects
- **Internpe**(1 months , online)   **2025**
Web Development Intern at Rinex Organization Developed a simple e-commerce website using HTML, CSS, and JavaScript.

PAPER PRESENTED

- Presented a technical talk on **"Edge Computing"** at **Kongu Engineering College.**
- Presented a technical talk on **"Camera Motion Detector"** at **Nandha Engineering College.**
